# Do Not let this happen to You!

On April 26th a customer brought hazardous materials into our facility and attempted to dump them illegally. This is a crime.

Two of our employees were adversely affected by this illegal dumping and had to seek medical attention.

Half of our tipping pad was unavailable to us for most of the day as Firemen neutralized the chemicals, the District Attorney's office did an investigation and Hazardous Materials Handlers were brought in to properly and safely dispose of the items.

This cost many of our customers great inconvenience and cost the person who illegally dumped hazardous material thousands of dollars.

We take the safety of our employees & your fellow customers very seriously!
